### REVIEW OF TRADE. Election Acts as a Brake on Business

at Present. New York, Oct. 27 .- R. G. Dun & Co.'s

Weekly Review of Trade says: "The elections mean a great deal to all business interests, and, although confidence in the future is seen on every hand, it is but natural that men do not care to take unnecessary chances, and, therefore, delay new engagements as far as possible until after the ballots are counted. But contracts for steel rails for the season thus far are within 50,000 tens of last year's heavy bookings. and the confidence in an ultimate mark-ed improvement is so strong that all raw materials are firm, and without any speculative activity to stimulate them. The agitation for an advance in billets, though a small one, is an in-dication of what the Iron and steel mar-kets expect in the next six months, and in the great industries sellers of ma-terial could easily make heavy contracts if they cared to attach political pro-

in the great industries sellers of material could easily make heavy contracts if they cared to attach political provisions to their agreements. However unreasonable features may be, it is likely to be better for busing as in the long run that conservative ideas for the present are entertained. The weather over a great part of the country has been favorable for agricultural operations, which are progressing well, and in the west the unscasonable temperatures have retarded general trade comparatively little, as there has been no great stimulus yet this season.

"Conditions in the from and steel market stendily improve; orders gradually swell in volume and buyers make less effort to secure concessions. In most cases quotations are not altered, but there is an advance to \$20 at Philadelphia for billets, owing to the better business in rails. Pig from moves freely, especially at Chicago, where manufacturers have contracted heavily for finished stuff in excess of raw material on hand. Cast fron pipe is in urgent demand and new plans for ship building will take plates. Bridge builders are buying structural forms heavily. Makers of rails and other products of fron have been accused of quoting better terms to foreign than to domestic buyers. If this is done, it would seem to be the manufacturer's affair rather

## A STRIKING ARTICLE. A Story of Two Well Known

The Cosmopolitan for November has an intensely interesting story entitled "Successful Personalities Sketched From Real Life," written by John Holms. The author says: "I propose to write the story of two boys—brothers." Then follows a graphic picture of the early struggles and the later achievements in life of two well known Kansans.

The article gives neither names nor locations, yet it is plainly a true story of two highly esteemed Topekans, who have won for themselves literally hosts of friends, as well as fame and good fortune. They are Charles S. Gleed and James Willis Gleed. Mr. Holms, but one of a host of admirers, has told a good story well. Topekans.
